

Sage Advice

INGREDIENTS

- 3 oz green jasmine tea
- ¾ oz sage simple syrup
- 1 tsp fresh lime juice
- Cucumber and lime

DIRECTIONS

To make simple sage syrup combine water and white sugar in a 1:1 ratio and heat until dissolved. Remove from heat, add 2-3 sprigs of sage and let sit for 30-60 minutes until cool, then remove sage. To make the Sage Advice, combine all liquids in a cold shaker and stir. Pour into a rocks glass over ice and garnish with cucumber and lime slices.

Tip: The tea is diluted in the drink, so brew it at a higher concentration than normal. In our experience, 4 oz of water per teabag is ideal.
